

Largest Egg Freezing Study Predicts the Probability of Having Children

Shady Grove Fertility physicians published the largest data findings of its kind in the U.S. showing the success rates associated with egg freezing. As a result, physicians can not only answer patient questions with even greater confidence, we can give women a better idea of how likely they are to conceive one, two, or three children based on the number of eggs they have frozen and their age at the time of freeze.

IN WOMEN <38
70-80%
WILL TAKE
HOME A BABY

When is an Egg Freezing Evaluation Indicated?

WHO AND WHEN TO REFER TO SHADY GROVE FERTILITY

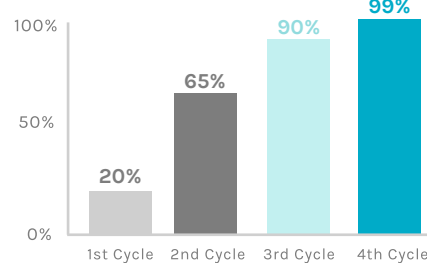

Anyone interested in egg freezing should be referred to Shady Grove Fertility for testing and consultation. Other ideal candidates for a referral include women:

- Ages 30 to 40 not considering conception in the near future (women in their early- to mid-30s have the highest chance of success)
- Recent cancer diagnosis
- History of endometriosis or dermoids
- Family history of premature ovarian failure or early menopause

How Many Eggs are Needed for Pregnancy?

WOMEN <38 SHOULD AIM FOR 15 TO 20 MATURE EGGS

Likelihood of Retrieving 20 Mature Eggs By Initiated Cycle

For many women, especially those under the age of 38, 15 to 20 mature eggs remains the appropriate goal for total eggs to freeze. The number of cycles needed to obtain 15 to 20 mature eggs depends on the patient's age and ovarian reserve status. To increase the chance of taking home a baby in women over the age of 37, the ideal number of mature eggs to freeze is 25 to 30.

How Many Egg Freezing Cycles Does a Woman Need?

ASSURE 20 AND ASSURE 30

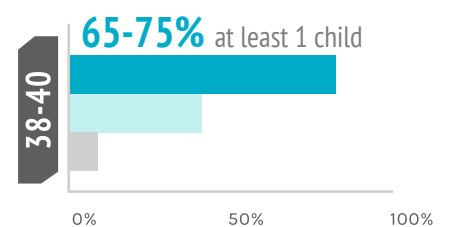

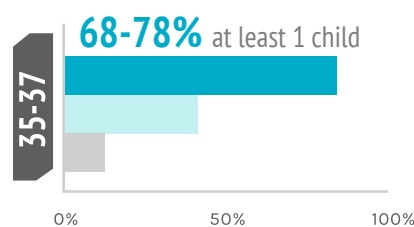

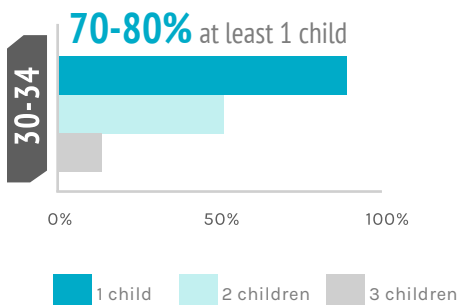

Our exclusive Assure programs offer women the security of knowing they will be able to obtain their desired number of eggs, based on their age, for a fixed fee. Women who achieve their intended number of eggs in the first cycle can receive a partial refund while those who require additional cycles will not incur any extra cycle expenses.

ASSURE 20
20 Eggs or 4 Cycles

ASSURE 30
25-30 Eggs or 5 Cycles

Predicted Probability of Having Children Using Frozen Eggs

BASED ON 15 TO 20 EGGS FOR WOMEN ≤37 AND 25 TO 30 EGGS FOR WOMEN 38 TO 40

Shady Grove Fertility Continues Expansion

Shady Grove Fertility continues to expand, making access to highly specialized fertility care more convenient for patients who are undergoing testing and treatment.

- **2 New Full-Service Offices in Pennsylvania:**
Bringing highly specialized fertility care to Warrington and Philadelphia.
- **3 Offices in Atlanta, Georgia:**
Formerly Georgia Reproductive Specialists (GRS), SGF Atlanta has 3 physicians and 3 convenient locations in Atlanta-Northside, Alpharetta, and Buckhead-Piedmont.
- **State-of-the-Art IVF Center in Fairfax, Virginia:**
The added convenience of a Fairfax, VA IVF Center eliminates the need to travel to Rockville, MD for IVF procedures. New facility opens Spring 2018.
- **Lower Cost, Increased Access to Money Back Guarantee Program:**
SGF relaunches IVF treatment guarantee program with lowered costs and extended eligibility for women up to age 41.

REFER WITH CONFIDENCE

SGF offers highly specialized fertility care and convenient access to testing and treatment, giving confidence to over 2,000 physicians who refer to SGF annually.
